Documentation Football

Documentation and demo site:

<http://api.demo.infostradasports.com/>

Football data in json:

<http://api.demo.infostradasports.com/download/PSVapp-data.zip>

Basic terms

Field	Description
Competition	Fixed competition, which will not change over time, like Premier League, World Cup Qualification UEFA.
Season	A specific season, like 2010/2011 (a 'winter' season played in two years) or 2011 (a 'summer' season for competitions that are played during one year, or competitions like the world cup).
Edition	A competition for a specific season, e.g. FA Premier League 2010/2011 or World Cup 2010.
Phase	A specific phase for a certain edition. In a regular national competition there's only one phase, the 'regular' phase. In cup competitions there are multiple phases, like groups, quarter-, semifinals and the final.
Match	A match is always played in a phase of an edition.
Person	Generic term for players, coaches, officials etc.
Action	An event taking place during a match, like goals, substitutions, cards

Dates in JSON

The 13 digits before the + is the number of milliseconds since January 1, 1970 in UTC, and the 4 digits after the + is the time difference between our server and UTC.

For example:

d_Date(1281786300000+0200) is 14 Aug 2010 11:45 +02.00 hours = 14 Aug 2010 13:45 CET
d_DateUTC(1281779100000+0200) is 14 Aug 2010 09:45 +02.00 hours = 14 Aug 2010 11:45 UTC (which is equal to 14 Aug 2010 13:45 CET)

The part after the + can either be +0100 for dates between late October and late March, or +0200 for dates between late March and late October when we are in Daylight Saving Time.

Method descriptions

GetEditionList

Return a list of current editions.

<http://demo.api.infostradasports.com/svc/Football.svc/json/GetEditionList?languagecode=1>

```
[
  {
    "n_CompetitionID" : 2,
    "c_Competition" : "Eredivisie",
    "n_CompetitionSet" : 1,
    "n_CompetitionNatioGeoID" : 2201,
    "c_CompetitionNatio" : "Nederland",
    "c_CompetitionNatioShort" : "NED",
    "n_CompetitionLevel" : 1,
    "n_EditionID" : 21399,
    "c_Season" : "2014/2015",
    "d_EditionStartDate" : "/Date(1407448800000+0200)/",
    "d_EditionEndDate" : "/Date(1433023200000+0200)/",
    "n_PhaseID" : null
  }
]
```

GetTeamList

Returns Teams in an Edition

Champions League 2010/2011

json:<http://demo.api.infostradasports.com/svc/Football.svc/json/GetTeamList?languagecode=1&EditionID=18045>

```
[
  {
    "n_TeamID" : 4301,
    "c_Team" : "AA Gent",
    "c_TeamShort" : "GNT",
    "n_TeamNatioGeoID" : 2205,
    "c_TeamNatio" : "Belgi??"
  }
]
```

```
{ "c_TeamNatioShort" : "BEL" }  
]
```

GetPhaseList

Return a list of phases of an edition.

Champions League 2010/2011

json:<http://demo.api.infostradasports.com/svc/Football.svc/json/GetPhaseList?languagecode=1&EditionID=18045>

```
[  
  { "n_PhaseID" : 86609 },  
  { "n_PhaseLevel" : 75 },  
  { "c_Phase" : "Kwalificatieronde 1" },  
  { "n_Phase1ID" : 86602 },  
  { "n_Phase1Nr" : 1 },  
  { "c_Phase1" : "Kwalificatie" },  
  { "n_Phase2ID" : 86609 },  
  { "n_Phase2Nr" : 1 },  
  { "c_Phase2" : "Kwalificatieronde 1" },  
  { "n_Phase3ID" : null },  
  { "n_Phase3Nr" : null },  
  { "c_Phase3" : null },  
  { "b_Table" : false },  
  { "b_Current" : false },  
  { "b_Currents" : false },  
  { "n_DateStart" : 20100629 },  
  { "n_DateEnd" : 20100707 }  
]
```

GetMatchList_Edition

Method returns all matches within an edition. This method should not be used to show live coverage.

Premier League 2010/2011

json:http://demo.api.infostradasports.com/svc/Football.svc/json/GetMatchList_Edition?languagecode=1&EditionID=18030

```

  { "n_MatchesOut" : 0},
  { "n_MatchesIn" : 0},
  { "n_MinutesPlayed" : 3420},
  { "n_Goals" : 0},
  { "n_OwnGoals" : 0},
  { "n_Assists" : 1},

```

```
{ "n_CardsYellow" : 0 },  
  { "n_CardsRed" : 0 },  
  { "n_CardsRedDirect" : 0 },  
  { "n_CardsRed2Yellow" : 0 }  
]
```

GetTableLive

Returns the virtual table during matches (includes matches which are in progress) for a phaseid. Returns normal ranking when no matches in progress

Premier League 2010/2011 - Regular phase

json:<http://demo.api.infostradasports.com/svc/Football.svc/json/GetTableLive?languagecode=1&PhaseID=86971>

```
[  
  { "n_EditionID" : 18030 },  
  { "c_Phase" : "Regulier" },  
  { "n_TeamID" : 4080 },  
  { "c_Team" : "Manchester United" },  
  { "c_TeamShort" : "MNU" },  
  { "n_TeamNatioGeoID" : 2208 },

GetHeadToHeadMatchList

Returns list of head to head matches between two teams.

- When matchId is passed, matches within that competition are returned, independent of the competitionId which is passed.
- When homeTeamId and awayTeamId are passed, matches in all competitions are returned, except when competitionId is passed.

Heerenveen-PSV in Eredivisie

Field descriptions

Football - n_ActionSet

Number to describe the type of action

- 1 = Goals
- 2 = Penalty shootout
- 3 = Cards
- 4 = Line-up
- 5 = Substitutions
- 6 = Substitutes not used
- 7 = Players not selected / suspended
- 8 = Coaches
- 9 = Officials
- 10 = Missed penalties
- 11 = Captain
- 12 = Free kick / Foul / Corner / Offside / Shot / Save
- 13 = Possession
- 14 = Temporarily out
- 15 = Other
- 16 = Time

Football - n_ActionCode, n_ActionCode2, n_ActionCode3

These fields describe an action in more detail than n_ActionSet. The document API_Football_ActionCodes.xls contains a list of all actioncodes. For most actions it is sufficient to just look at n_ActionCode to uniquely identify it. Only for some n_ActionCodes you also have to take n_ActionCode2 and n_ActionCode3 into account. When n_ActionCodes 2 and/or 3 are irrelevant, they have NULL values in the sheet. The Remark column in the sheet is not in the API data, it is just to clarify to distinction between Actions that have the same c_Action.

Football - n_CompetitionSet

Describes the type of competition

- 1 = Domestic League (e.g. French Ligue 1)
- 2 = Domestic Cup (e.g. English FA Cup)
- 3 = International Club competition (e.g. Champions League)
- 4 = International Country competition (e.g. FIFA World Cup)

Football - n_FunctionType

Unique number to describe the function of a person in a match.

- 1 = Keeper
 - 2 = Defender
 - 4 = Midfielder
 - 8 = Forward
 - 16 = Coach
 - 64 = Referee
 - 128 = Linesman
 - 131072 = Suspended
 - 1073741824 = 4th Official
- Football - n_FunctionCode

can contain the same values as n_FunctionType but n_FunctionCode can also contain multiple codes (e.g. 20 = Midfielder + Trainer)

Football - b_LineupProvisional, b_LineupOfficial

Whether the lineup is provisional or official can be determined from these fields in GetMatchInfo:

When the lineup has become official, b_LineupProvisional will be "false" and b_LineupOfficial will have become "true"

Football - n_MatchStatusCode

Code that determines the status a match is in.

- 2 = Line-up

4 = Not Started
6 = Combination of 2 Line-up and 4 Not Started
8 = In Progress
16 = Interval
32 = Suspended
128 = Finished
192 = Unofficial result
256 = No Live Updates (ISS Internal code)
512 = Abandoned
1024 = Postponed
2048 = Delayed

If a match is stopped temporarily, n_MatchStatusCode is set to 32 (=Suspended).

If it becomes clear that the match, after being suspended, will not be restarted on the same day, n_MatchStatusCode is set to 512 (=Abandoned).

Football - n_PeriodSort

Unique number to describe the period the match is currently in.

1 = Not started
2 = 1st Half
3 = Halftime
4 = 2nd Half
5 = 90 mins
6 = 1st Extra Time
7 = 105 mins
8 = 2nd Extra Time
9 = 120 mins
10 = Penalty Shootout
11 = End

Football - n_RankCode, n_MinRankCode, n_MaxRankCode

This codes describe the where a rank qualifies for (n_RankCode), what the least is where a team in a certain rank can qualify for (n_MinRankCode) or what the best is where a team in a certain rank can qualify for (n_MaxRankCode).

2 = Championship play-off
4 = Relegation play-off
8 = Relegation
16 = Promotion
32 = Promotion play-off
64 = Champions League / EC I
128 = Champions League preliminary round
256 = UEFA Cup
512 = UEFA Cup depending on domestic cup
1024 = Next round
2048 = Play-off
4096 = Final tournament

8192 = Champions League play-off
16384 = UEFA Cup play-off
131072 = Copa Libertadores
262144 = Copa Sudamericana
524288 = Champions
536870912 = UEFA Cup through domestic cup
1073741824 = Period champion
Football - b_RescheduledToBeResumed

If the new match date is known, after being abandoned, the Boolean b_RescheduledToBeResumed is set to true, and n_MatchStatusCode is set to 0.

Football - n_RoundNr

Is part of the GetMatchListEdition method. Can be used to determine the matches in a particular round.

This column contains the roundnr within a phase and will be filled in phases like: - regular phases in domestic leagues

- group phases in international competitions (e.g. WCh, ECh)

However, if one wishes to determine which matches are played in a particular week, it is better to use the GetMatchDayList call. That one shows the dates per weekly range. One might miss out on a match in case the match is played not in its regular week because of rescheduling.
